## Installation Instructions

### One Step

If you **haven't** modified jobs.php or sidebar.php, there's only one step...

Look in the directory where you unzipped the file. Upload all files to your main directory of your HealthCare site.

***That's it!***

***Enjoy....***

If you have modified jobs.php or sidebar.php, we assume you can also modified what's necessary herein. Or you can hire us for customization at \$67 per hour.

## Sitemap

1. Create your sitemap at <http://sitemapxml.net/>
2. Download and upload the unedited file to your HealthCare site.
3. Submit your HealthCare site to top search engines at <http://www.sitemapwriter.com/notify.php>  
your web address should be something like: <http://yourhealthcaresite.com/sitemap.xml>

Your site should be indexed at the top search engines within 48 hours. That's the BIG SECRET the so-called gurus charge \$37 just for the privilege of “their” knowledge. *(Of course they add 30+ pages of fluff so it looks good.)*
